

Cardiology Services at Sri Ponni Medical Centre – Expert Heart Care You Can Trust

Your heart works every second of every day — and when something feels wrong, you need a team that takes it seriously. At Sri Ponni Medical Centre, the Cardiology department is built around one simple goal: keeping your heart healthy at every stage of life.

What Is Cardiology?

Cardiology is the branch of medicine focused on diagnosing and treating conditions related to the heart and blood vessels. From managing high blood pressure and cholesterol to treating complex cardiac conditions, cardiologists play a vital role in protecting your long-term health.

At Sri Ponni Medical Centre, cardiology care goes beyond just treating symptoms — it is about understanding the root cause and building a plan that works for you.

What the Cardiology Department Offers?

The cardiology team at Sri Ponni Medical Centre provides a wide range of services designed to meet every patient's needs:

- **Routine Heart Check-ups** — Regular screenings to detect early warning signs before they become serious
- **Advanced Diagnostic Tests** — Modern technology to accurately assess heart function and identify problems
- **Risk Management** — Personalized guidance to manage risk factors like diabetes, hypertension, and lifestyle habits
- **Proven Treatment Plans** — Evidence-based treatments tailored to each patient's condition and recovery goals
- **Ongoing Recovery Support** — Continuous care and monitoring through every stage of the healing process

Why Choose Sri Ponni for Heart Care?

The cardiology team at Sri Ponni Medical Centre combines medical expertise with genuine compassion. Every patient is treated as an individual — not just a condition. Whether you are visiting for a routine check-up or seeking specialist advice for an existing heart condition, the team is equipped to guide you with clarity and care.

Affordable, accessible, and patient-focused — Sri Ponni Medical Centre is committed to making quality heart care available to every family.

Frequently Asked Questions (FAQ)

Q1. What conditions does the Cardiology department at Sri Ponni Medical Centre treat? The cardiology team treats a wide range of heart-related conditions including high blood pressure, coronary artery disease, heart failure, arrhythmia, and high cholesterol. Both routine and complex cardiac cases are managed with personalized care plans.

Q2. Do I need a referral to see a cardiologist at Sri Ponni Medical Centre? No referral is required for a cardiology consultation at Sri Ponni Medical Centre. You can directly book an appointment and the team will assess your condition and recommend the appropriate course of treatment.

Q3. What diagnostic tests are available in the Cardiology department? The department is equipped with modern diagnostic tools to evaluate heart health accurately. These include ECG, echocardiography, stress tests, and other advanced cardiac assessments based on the patient's condition.

Q4. Is cardiology care at Sri Ponni Medical Centre affordable? Yes. Sri Ponni Medical Centre is committed to providing high-quality cardiac care at affordable prices, ensuring that every patient — regardless of background — has access to expert heart treatment.

Q5. How often should I get a heart check-up? It is generally recommended to have a routine heart check-up at least once a year, especially if you are above 40 or have risk factors such as diabetes, high blood pressure, being overweight, or a close relative with a history of heart disease. The cardiology team at Sri Ponni can advise you on the right frequency based on your personal health profile.
